E. SELECTED NOTES TO THE FINANCIAL STATEMENTS

1. Corporate information

Biolidics Limited (Registration No. 200913076M) is a limited liability company incorporated and domiciled in Singapore. The Company is listed on the Catalist of SGX-ST.

The condensed interim financial statements for 4Q FY2022 and FY2022 comprise the Company and its subsidiaries (collectively, the “**Group**”).

The principal activities of the Group and the Company are those relating to:

- (a) technology development, technology transfer, marketing, sale and distribution of biomedical technology, life and medicine science related products and services;
- (b) provision of laboratory services; and
- (c) investment holding.

2. Basis of preparation

The condensed interim financial statements for 4Q FY2022 and FY2022 have been prepared in accordance with Singapore Financial Reporting Standards (International) (“**SFRS(I)**”) 1-34 *Interim Financial Reporting* issued by the Accounting Standards Council Singapore. The condensed interim financial statements do not include all the information required for a complete set of financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the Group’s financial position and performance of the Group since the last audited financial statements for the year ended 31 December 2021 (“**FY2021**”).

The condensed interim financial statements are presented in Singapore Dollars which is the Company’s functional currency. All financial information presented in Singapore Dollars have been rounded to the nearest thousand, unless otherwise stated.

Material Uncertainty Related to Going Concern

The Group had recorded a net loss of approximately S\$9.37 million and a net operating cash outflow of approximately S\$3.05 million for FY2022. As at 31 December 2022, the Group’s current liabilities exceeded its current assets by approximately S\$0.09 million and the Group was in a net equity deficit position of approximately S\$1.69 million. As at 31 December 2022, the Company was in a net deficit equity position of approximately S\$1.72 million. These conditions indicate that a material uncertainty exists that may cast significant doubt on the Group’s ability to continue as a going concern.

To improve the financial health and working capital position of the Group, the Company has completed a renounceable non-underwritten rights issue of new ordinary shares in the issued share capital of the Company (“**Rights Shares**”) in December 2022 (“**Rights Issue**”) pursuant to which the Company has raised net proceeds of approximately S\$5.42 million. As at 31 December 2022, the Group had cash of S\$5.03 million.

To support that the financial statements of the Group have been prepared on a going concern basis and to ensure the adequacy of funds required to meet its obligations, working capital and capital commitment needs, the Group has prepared a consolidated cash flow forecast for a 16-month period from 1 January

2023 to 30 April 2024 (“**Cash Flow Forecast**”). In preparing the Cash Flow Forecast, management has taken the following into consideration:

- the challenges faced by the cancer business during the current COVID-19 pandemic and the impact of the emergence of competing and newer technologies on the sales of COVID-19 related products in the infectious diseases business;
- the forecasted cash flow from the laboratory services business which is mainly dependent on the projected sales of its SARS-CoV-2 polymerase chain reaction (“**PCR**”) testing for COVID-19; and
- the cost cutting measures that the Group has put in place to manage costs.

After taking into consideration the Cash Flow Forecast, the board of directors of the Company (“**Board**”) is of the opinion that the Group and the Company will be able to operate as a going concern and that the use of the going concern assumption in the preparation of the consolidated financial statements of the Group for FY2022 is appropriate.

Due to the rapidly evolving nature of the COVID-19 pandemic, the demand for COVID-19 PCR tests continues to be exposed to various uncertainties and challenges such as the emergence of competing and newer technologies, product regulatory changes, and changes in travel policies and restrictions. The Group is closely monitoring the developments of the situation and the impact on its COVID-19 PCR testing services.

If the going concern assumption is no longer appropriate, adjustments may have to be made to reflect the situation that assets may need to be realised other than in the normal course of business and at amounts which may differ significantly from the amounts at which they are currently recorded in the statements of financial position. In addition, the Group and the Company may have to reclassify non-current assets and liabilities as current assets and liabilities, respectively. Such adjustments have not been made to these financial statements.

2.1 New and amended standards adopted by the Group

The Group has applied the same accounting policies and methods of computation in the preparation of the condensed interim financial statements for FY2022 as compared to those applied in the audited financial statements for FY2021 except for the adoption of new or revised SFRS(I) and Interpretations of Singapore Financial Reporting Standards (“**SFRS(I) INT**”) that are mandatory for financial years beginning on or after 1 January 2022. The Group has adopted all applicable SFRS(I) and SFRS(I) INT that are mandatory for financial years beginning on or after 1 January 2022. The adoption of these SFRS(I) and SFRS(I) INT has no significant impact on the Group’s consolidated financial statements.

2.2 Use of judgements and estimates

The preparation of the Group’s consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities at the end of each reporting period. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in the future periods.

The significant judgements made by management in applying the Group’s accounting policies and the key sources of estimation uncertainty were the same as those that applied to the audited financial statements for FY2021.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Information about critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements is as follows:

- Identification of a cash-generating unit (“**CGU**”) - Management identified the Group’s cancer business and laboratory services business as the 2 CGUs in the Group, having considered the products and services being sold by the Group and the inter-dependency of the cashflows arising from the products and services provided within a CGU.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next reporting period are included in the following notes:

- Impairment assessment of plant and equipment, right-of-use assets and intangible assets

Based on the review carried out by the Group, management determined that there are indicators of impairment for the Group’s plant and equipment, right-of-use assets and intangible assets. The Group determines the recoverable amounts of the cancer and laboratory services CGUs based on the higher of fair value less cost to sell (“**FVLCTS**”) and value-in-use (“**VIU**”). The VIU calculations are based on cash flow projections covering a five-year period. The key assumptions for the VIU calculations are those regarding the discount rates, revenue growth rates, terminal growth rate and gross profit margin for the projection periods. Accordingly, the Group has made impairment on these assets in FY2022 based on the higher of FVLCTS and VIU.

- Impairment assessment of goodwill on consolidation

The recoverable amount of the laboratory services business’ CGU, which goodwill has been allocated to, is determined based on the income method. The income method is based on cash flow projections covering a five-year period. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash inflows. The estimated recoverable amounts of the CGU is lower than the carrying amount of the CGU. Accordingly, the Group has made impairment on goodwill in FY2022.

- Share-based compensation

The Group measured the cost of equity-settled transactions with a director and employees of the Group and third-party individuals by reference to the fair value of the equity instruments at the date at which they are granted and the probability of achieving the predetermined performance targets and service conditions. Significant judgement and estimation are involved in determining the probability of achieving the predetermined performance targets and service conditions in computing the number of shares that will eventually vest during the vesting period.

- Expected credit losses (“**ECLs**”)

The Group uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns. The provision matrix is initially based on the Group’s historical observed default rates. The Group will calibrate the matrix to adjust historical credit loss experience with forward-looking information. At every

reporting date, historical default rates are updated and changes in the forward-looking estimates are analysed. The assessment of the correlation between historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and of forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of customer's actual default in the future. As at 31 December 2022, the carrying amount of the Group's trade receivables was S\$0.52 million (31 December 2021: S\$0.13 million).

In determining the loss allowance for amount due from subsidiaries, when measuring ECL, the Group uses reasonable and supportable forward-looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other. Loss given default is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements. Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and future conditions. As at 31 December 2022, the carrying amount of the Company's receivables due from subsidiaries was S\$0.42 million (31 December 2021: S\$1.77 million)

- Impairment assessment of investment in subsidiaries

The recoverable amounts of the investment in subsidiaries are reviewed at the end of each reporting period to determine whether there is any indication of impairment. If any indication exists, the recoverable amount is estimated in order to determine the extent of the impairment loss (if any). The Company has estimated the recoverable amounts for its investment in subsidiaries based on the income method. The recoverable amounts are most sensitive to discount rate, estimated revenue growth rate, estimated gross profit margin and profitability of the subsidiaries. As at 31 December 2022, the carrying amount of the Company's investment in subsidiaries was nil (31 December 2021: S\$4.97 million).

3. Seasonal operations

The Group's businesses were not affected significantly by seasonal or cyclical factors during the financial period/year.

4. Revenue

The Group derives its revenue from the transfer of goods and services over time and at a point in time in the following major revenue streams. This is consistent with the revenue information that is disclosed for each reportable segment under SFRS(I) 8 (see Note 23).

3A Where the latest financial statements are subject to an adverse opinion, qualified opinion or disclaimer of opinion:

(a) Updates on the efforts taken to resolve each outstanding audit issue.

(b) Confirmation from the Board that the impact of all outstanding audit issues on the financial statements have been adequately disclosed.

This is not required for any audit issue that is a material uncertainty relating to going concern.

The Company's independent auditors, Ernst & Young LLP, had issued a disclaimer of opinion (the “**Disclaimer of Opinion**”) in their independent auditor's report dated 11 April 2022 on the audited consolidated financial statements of the Group and the Company for FY2021. The basis for the Disclaimer of Opinion is in relation to (i) the use of the Group's going concern assumption and (ii) the impairment assessment of the Group's plant and equipment, right-of-use assets, intangible assets and goodwill, and the Company's investments in subsidiaries and other receivable due from a subsidiary.

(i) Use of the Group's going concern assumption

To improve the financial health and working capital position of the Group, the Company has completed the Rights Issue in December 2022, raising net proceeds of approximately S\$5.42 million.

As disclosed under Note 2 under Section E - Selected notes to the financial statements of this announcement, management has prepared the Group's and the Company's financial statements for FY2022 on the basis that the Group and the Company will be able to carry on as a going concern for at least twelve months from the end of FY2022 based on factors disclosed in that note.

In the event the going concern assumption is no longer appropriate, the financial effects of adjustments to the carrying amounts, and the current and non-current classification of the Group's and Company's assets and liabilities as at 31 December 2022 could be material and pervasive and the Company is unable to determine the extent of the adjustments that may be required.

(ii) Impairment assessment of the Group's plant and equipment, right-of-use assets, intangible assets and goodwill, and the Company's investments in subsidiaries and other receivable due from a subsidiary

Management has assessed that there exists an indication that the Group's long-lived assets and the Company's investment in Biomedics Laboratory Pte. Ltd. (“**BML**”) and receivable from BML may be impaired. Accordingly, management has determined that the recoverable amounts and made the subsequent impairment losses. Please refer to Notes 2.2, 11, 12, 13 and 14 under Section E - Selected notes to the financial statements of this announcement for further details.

The Board confirms that the impact of all outstanding audit issues on the financial statements have been adequately disclosed.

- 8 A review of the performance of the group, to the extent necessary for a reasonable understanding of the group's business. It must include a discussion of the following:**

- (a) any significant factors that affected the turnover, costs, and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors; and**
- (b) any material factors that affected the cash flow, working capital, assets or liabilities of the group during the current financial period reported on.**

REVIEW OF THE GROUP'S PERFORMANCE

Revenue

Revenue increased by 7.6% or S\$0.18 million, from S\$2.31 million in FY2021 to S\$2.49 million in FY2022, due mainly to an increase in revenue from rendering of laboratory services from S\$0.16 million in FY2021 to S\$1.94 million in FY2022. The significant increase in revenue from rendering of laboratory services was due to an increase in PCR test services as we began providing PCR test services on a 24/7 basis. The increase in demand for PCR test services was due mainly to the increase in the number of travelers from the People's Republic of China.

The increase was offset by a decrease in sales of our COVID-19 related products which amounted to S\$0.34 million in FY2022, as compared to S\$1.81 million in FY2021, arising from a growing supply of antigen and antibody test kits which led to a highly competitive market under the constraints of intense price competition. Revenue from the sales of our ClearCell® FX1 system,

our CTChip® FR1 biochip and other related services and consumables also decreased from S\$0.34 million in FY2021 to S\$0.21 million in FY2022.

Revenue increased by 70.9% or S\$0.43 million, from S\$0.61 million in 4Q FY2021 to S\$1.04 million in 4Q FY2022 due to an increase in revenue from rendering of laboratory services from S\$0.04 million in 4Q FY2021 to S\$0.96 million in 4Q FY2022 for the same reasons as mentioned above.

The increase was partially offset by zero sales of COVID-19 related products in 4Q FY2022 as compared to sales of S\$0.49 million in 4Q FY2021. Revenue from the sales of our ClearCell® FX1 system, our CTChip® FR1 biochip and other related services and consumables was unchanged at S\$0.08 million in 4Q FY2021 and 4Q FY2022.

Other income

Other income decreased by S\$0.07 million or 19.3%, from S\$0.38 in FY2021 to S\$0.31 million in FY2022, mainly due to a decrease in government grants of S\$0.02 million and a decrease in gain from remeasurement of deferred consideration of S\$0.03 million.

Other income in 4Q FY2022 was nil, as compared to other income of S\$0.14 million in 4Q FY2021, mainly due to a decrease in government grants of S\$0.09 million and a decrease in gain from remeasurement of deferred consideration of S\$0.05 million.

Changes in inventories

We recorded a decrease of S\$0.22 million and S\$0.09 million in the closing balance of our inventories in FY2022 and 4Q FY2022 respectively, as compared to a decrease of S\$0.04 million and S\$0.25 million in FY2021 and 4Q FY2021 respectively. The fluctuations in the balance of our inventories were due mainly to the timing of purchase and sale of inventories.

Purchases

Our purchases decreased by S\$0.69 million or 38.2%, from S\$1.80 million in FY2021 to S\$1.11 million in FY2022, in line with the decrease in sales of our COVID-19 related products during the financial year.

Our purchases increased from S\$0.02 million in 4Q FY2021 to S\$0.37 million in 4Q FY2022 in line with the increase in revenue in rendering of laboratory services during the financial period.

Employee benefits expense

Employee benefits expense increased by S\$1.23 million or 74.9%, from S\$1.65 million in FY2021 to S\$2.88 million in FY2022, and by S\$0.62 million or 147.6%, from S\$0.42 million in 4Q FY2021 to S\$1.04 million 4Q FY2022, due mainly to increased hiring to support the growth of our laboratory services business and provisions made for share awards under the Biolidics' Performance Share Plan.

Depreciation expense

Depreciation expense decreased by S\$0.08 million or 9.1% from S\$0.84 million in FY2021 to S\$0.76 million in FY2022 and by S\$0.10 million or 43.9% from S\$0.22 million in 4Q FY2021 to S\$0.12 million in 4Q FY2022, due to certain assets being fully depreciated.

Amortisation expense

Amortisation expense remained relatively unchanged at S\$0.42 million in FY2021 and FY2022, and at S\$0.11 million in 4Q FY2021 and 4Q FY2022.

Research and development ("R&D") expense

R&D expense decreased by S\$0.86 million or 79.2%, from S\$1.09 million in FY2021 to S\$0.23 million in FY2022 and by S\$0.41 million or 93.0% from S\$0.44 million in 4Q FY2021 to S\$0.03 million in 4Q FY2022, due mainly to the reduction in R&D activities during the financial year/period.

Other expenses

Other expenses increased by S\$4.16 million or 153.7%, from S\$2.70 million in FY2021 to S\$6.86 million in FY2022, and by S\$4.88 million or 482.4%, from S\$1.01 million in 4Q FY2021 to S\$5.89 million in 4Q FY2022, due mainly to impairment of intangibles assets of S\$3.13 million, impairment of goodwill of S\$0.63 million, impairment of plant and equipment and right-of-use assets of S\$0.28 million in aggregate and allowance for inventories of S\$1.30 million in FY2022 and 4Q FY2022. These increases were partially offset by decreases in professional fees (cash-settled) by S\$0.80 million from S\$1.52 million in FY2021 to S\$0.72 million in FY2022 and by S\$0.19 million, from S\$0.45 million in 4Q FY2021 to S\$0.26 million in 4Q FY2022.

Finance costs

Finance costs decreased by S\$0.04 million or 19.2%, from S\$0.21 million in FY2021 to S\$0.17 million in FY2022, and by S\$0.01 million or 20.4%, from S\$0.05 million in 4Q FY2021 to S\$0.04 million in 4Q FY2022, due mainly to the reducing balances of the term loans.

Income tax credit

Income tax credit pertains to the reversal of deferred tax liabilities arising from the CAP Accreditation of Biomedics Laboratory Pte. Ltd.. Income tax credit increased by S\$0.42 million in FY2022 and 4Q FY 2022 as a result of the reversal of deferred tax liabilities arising from fair valuation of intangible assets.

Loss for the year/ period

As a result of the foregoing, loss for the year/ period increased by S\$3.39 million or 56.7%, from S\$5.98 million in FY2021 to S\$9.37 million in FY2022, and by S\$4.46 million or 253.8%, from S\$1.76 million in 4Q FY2021 to S\$6.21 million in 4Q FY2022.

REVIEW OF THE GROUP'S FINANCIAL POSITION

Non-current assets

The Group's non-current assets decreased by 96.8% or S\$5.15 million, from S\$5.31 million as at 31 December 2021 to S\$0.17 million as at 31 December 2022. This was due mainly to a decrease in plant and equipment, right-of-use assets, intangible assets and goodwill of S\$0.74 million, S\$0.28 million, S\$3.50 million and S\$0.63 million respectively, which arose mainly from the depreciation, amortisation and impairment charges during the financial year.

Current assets

The Group's current assets decreased by 3.1% or S\$0.19 million, from S\$6.11 million as at 31 December 2021 to S\$5.92 million as at 31 December 2022. This was due mainly to a decrease in (i) inventories of S\$1.48 million (ii) prepayments of S\$0.11 million; and (iii) other receivables of S\$0.06 million, partially offset by an increase in (i) cash and cash equivalent of S\$1.07 million; and (ii) trade receivables of S\$0.39 million.

Current liabilities

The Group's current liabilities increased by 148.6% or S\$3.59 million, from S\$2.42 million as at 31 December 2021 to S\$6.01 million as at 31 December 2022. This was due mainly to an increase in (i) deferred consideration of S\$3.24 million; (ii) other payables of S\$0.28 million; (iii) contract liabilities of S\$0.07 million and (iv) current portion of borrowings of S\$0.03 million, partially offset by a decrease in current portion of lease liabilities of S\$0.04 million.

As at 31 December 2022, the Group's current liabilities exceeded its current assets by approximately S\$0.09 million and the Group was in a net equity deficit position of approximately S\$1.69 million.

Non-current liabilities

The Group's non-current liabilities decreased by 73.5% or S\$4.91 million, from S\$6.68 million as at 31 December 2021 to S\$1.77 million as at 31 December 2022. This was due mainly to a decrease in (i) deferred consideration of S\$3.21 million; (ii) borrowings of S\$1.05 million comprising the non-current portion of working capital bank loans; (iii) non-current portion of lease liabilities of S\$0.17 million; and (iv) deferred tax liabilities of S\$0.48 million.

REVIEW OF THE GROUP'S CASH FLOW STATEMENT

Operating cash outflow before movements in working capital amounted to S\$3.12 million in FY2022. Net cash used for working capital amounted to S\$0.18 million due mainly to (i) an increase in trade and other payables of S\$0.30 million; (ii) a decrease in other receivables of S\$0.05 million; (iii) a decrease in prepayments of S\$0.11 million, and (iv) a decrease in inventories of S\$0.12 million, partially offset by an increase in trade receivables of S\$0.47 million. As a result, net cash used in operating activities was S\$3.05 million in FY2022.

Net cash generated from investing activities in FY2022 amounted to S\$0.01 million. This was due mainly to receipt of government grants of S\$0.10 million, offset by (i) additions to plant and equipment of S\$0.03 million and (ii) additions to intangible assets of S\$0.06 million.

Net cash generated from financing activities in FY2022 amounted to S\$4.17 million. This was due mainly to proceeds from the Rights Issue less share issuance expenses of S\$5.48 million, partially offset by payment of S\$1.02 million and S\$0.29 million of the principal portion of borrowings and principal portion of lease liabilities, respectively in FY2022.

As a result of the above, there was a net increase in cash and cash equivalents by S\$1.12 million, from S\$3.96 million as at 31 December 2021 to S\$5.03 million as at 31 December 2022.

Not applicable. No forecast or prospect statement has been previously disclosed to shareholders.

10 A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

In FY2022, the Group's commenced COVID-19 PCR testing, as one of its service offerings which it will continue to offer in the current financial year ending 31 December 2023.

As set out under Note 8 under Section F – Other information required under the Catalist Rules of this announcement, revenue from rendering of COVID-19 PCR test services accounted for more than 90% of the Group's revenue in 4Q FY2022. However, due to the rapidly evolving nature of the COVID-19 pandemic, the demand for COVID-19 PCR tests continues to be exposed to various uncertainties and challenges such as the emergence of competing and newer technologies, product regulatory changes, and changes in travel policies and restrictions as well as emergence of new competitors providing similar PCR test services. As such, there is no certainty that such revenue from rendering of COVID-19 PCR test services will continue to increase or be maintained at the level achieved in 4Q FY2022. The COVID-19 pandemic has resulted in significant delays to the Group's development of its Cancer business segment. The Group will continue to review its product and service offerings in order to keep pace with the uncertainties and challenges and ensure that the Group's business remains relevant and sustainable. The Group will also continue to explore merger and acquisition opportunities to improve its financial performance.

To manage the challenges and uncertainties, including rising cost of conducting business, the Group has since June 2022 implemented cost rationalisation measures such as streamlining of its manpower structure, scaling down of the R&D activities for its Cancer business segment, and reducing the engagement of external service providers.

To strengthen its financial position, the Group has completed the Rights Issue in December 2022 and may explore opportunities to monetise its assets, including its intellectual properties which is encapsulated in the ClearCell® FX1 system as well as fund raising opportunities, including undertaking equity issuances in the future.

The Company will continue to provide timely updates to its shareholders should there be any material development affecting the Group's business and operations.
